Quality with Reduced Weight

Han-Eco® – the new HARTING housing series made of robust high-performance plastic. The new Han-Eco® thermoplastic housing has excellent mechanical properties and it is lightweight. Moreover it is highly resistant against environmental influences and can additionally use one extra module from the Han-Modular® series. Versions of the hoods come with either straight or angled entries and housings, bulkhead mounting, can be supplied in all Han® B sizes. Versatile use at lower cost.

HARTING: Pushing Performance to innovative solutions.
